Client Company
100 Other Street
Chicago, IL 60604

Dear Client Contact,

CREtelligent was contracted by Client Company (herein referred to as the “Client”) to conduct an EnviroScreen Report (AKA - Records Search with Risk Assessment [RSRA]) on a Multi-family Residential Property located at Main Street, Anytown, CA 93612 ((herein referred to as the “subject property”). CREtelligent received written authorization from the Client on March 8, 2023 to perform the EnviroScreen Report. This EnviroScreen Report was performed in general accordance with Standard Practices for RSRA's, the Engagement Agreement for Services Proposal 23C08-43944-586 executed by the Client. Exceptions to or deletions from this protocol are discussed in this report.

We appreciate your business. If you have any questions regarding the attached report, or if we can be of any further service to you, please do not hesitate to contact us at (866) 901-7201.

Sincerely,

Agnes Borko
Client Success Manager
Direct Line: (203) 805-7052

1.0 EXECUTIVE SUMMARY AND SCOPE

In accordance with the Engagement Agreement for Services executed by the Client, CREtelligent (herein referred to as "CREtelligent") has completed an EnviroScreen® (herein referred to as "EnviroScreen®") for the subject property. This report has been completed by an EPA-qualified Environmental Professional (EP) using: Regulatory database search Per ASTM E1527-13; available historical resources (Aerial Photographs, Sanborn/Fire Insurance Maps, and City Directory [where available]) for the subject property; and Client Provided Information (when provided & relevant to environmental risk). The results of the Environmental Professionals evaluation are presented as an approximate level of cumulative environmental risk at levels of LOW, MODERATE, or ELEVATED, as defined below:

- **LOW** - CREtelligent's EP Review identified no items of environmental concern on and/or nearby the subject property.
- **MODERATE** - CREtelligent's EP Review identified several environmental issues of concern on and/or nearby the subject property.
- **ELEVATED** - CREtelligent's EP Review identified significant environmental issues of concern on and/or nearby the subject property.

The Client of this EnviroScreen® report should not draw any conclusions and/or take any actions without reading this EnviroScreen® report in its entirety.

1.1 Final Risk Rating and Recommendation

The following recommendation is made based on the identified Environmental Risk:

- **LOW** - No environmental concerns were identified in connection with the subject property.

Should the customer decide that additional environmental research is desired, please contact your CREtelligent Client Success Manager at (866) 901-7201 or support@CREtelligent.com for additional assistance.

1.2 Project Personnel

This report has been prepared under the supervision of an EP with a final review by an EP.

I declare that, to the best of my professional knowledge and belief, I meet the definition of an Environmental Professional as defined in §312.10 of 40 Code of Federal Regulations (CFR) Part 312 and I have the specific qualifications based on education, training, and experience to assess a property of its setting, history, nature, and environmental influences.

Christopher Evans
Environmental Professional

The following CREtelligent personnel were directly responsible for the preparation of this report:

Michelle Manning
Project Manager

The resumes of the Senior Environmental Professional and Project Managers are provided in Appendix - [Consultant Resumes](#).

Figure 1: Subject Property Map

Multi-family Residential Property
26 Dove St
Albany, NY 12210

2.0 SUBJECT PROPERTY INFORMATION

The subject property information is based on available information obtained from the Client, on-line assessor information, Google Earth, Google Street view, and/or other readily available resources. Without performing an actual site reconnaissance, this description is reliant on information that cannot be readily verified and the reader is cautioned that current site conditions may vary from this description.

IDENTIFIER	DESCRIPTION OF IDENTIFIED ITEMS
Subject Property Address	26 Dove Street, Albany, NY 12210
Subject Property Legal Description	The full legal description is included in Appendix - Additional Information .
Parcel ID	76.24-7-16
Subject Property Zoning	R-T - Townhouse
Acres	0.07
Number of Buildings	One
Number of Stories	Three-story with basement
Square Footage	5,165
Year of Construction	1894
Current Use	Apartment Complex
Current Owner(s) of Subject Property	Scott Commander, LLC
Current Occupant(s) of Subject Property	Most recently identifiable occupant(s): Seven unit Multi-family Residential Property
Subject Property Utilities	Applicable Provider

Please see Appendix - Additional Information .

3.0 CLIENT PROVIDED INFORMATION

At the time of the writing of this report additional information relevant to environmental risk were not provided by the Client unless otherwise referenced below (i.e. previous Phase I Environmental Site Assessment [ESA], Phase II ESA, environmental risk reviews, environmental questionnaire, and/or other pertinent information providing insight to the subject property). Client provided information is summarized as follows:

- No information was provided by the Client.

4.0 RECORDS REVIEW

The following subsections summarize information obtained through the review of available records. The following subsections include historical use information and environmental records review.

4.1 Historical Use Information

To establish the history of the subject property, CREtelligent ordered, reviewed, and interpreted multiple historical resources. These historical resources were provided by CREtelligent's proprietary database and/or third-party sources. These historical resources include but are not limited to the following: aerial photography; Sanborn/fire insurance maps; and city directories (where available). CREtelligent reviewed the following historical documents:

HISTORICAL RESOURCE	YEARS REVIEWED
Aerial Photographs	1952, 1960, 1973, 1977, 1985, 1995, 2006, 2009, 2011, 2013, 2015, 2017, 2019, and 2021. The aerial photographs are of varying sizes and clarity.
Sanborn/Fire Insurance Maps	1892, 1909, 1934, 1950, 1989, and 1990. The Sanborn/fire insurance maps are of varying sizes and clarity.
City Directories	1925, 1930, 1935, 1940, 1945, 1950, 1955, 1960, 1965, 1970, 1975, 1979, 1983, 1988, 1993, 1998, 2000, 2003, 2008, 2012, 2016, 2020, and 2022.
Other	City of Albany Assessor, 2023.

Based on the available historical resources, the prior uses of the subject property are summarized in the table below:

YEAR RANGE	TYPE OF DOCUMENT	DESCRIPTION	RISK
1892	Sanborn/FIM	The fire insurance map from 1892 identifies the subject property as a two-story dwelling.	

YEAR RANGE	TYPE OF DOCUMENT	DESCRIPTION	RISK
1894-2023	Sanborn/FIM	The subject property has been developed with the current three-story dwelling with basement. City directories show that from as early as 1925 the property's use has been solely residential.	
	City Directory		
	Aerials		
	Assessor		

A summary of the concerns and/or risks specific to the subject property is provided below:

- The subject property was initially developed for residential use sometime prior to 1892. The subject property was then redeveloped for multi-tenant residential use in 1894 and has not changed since that time.
- No environmental concerns were identified during the historical review.

4.2 Regulatory Database Records Review

At the time of writing this report, CREtelligent reviewed regulatory database information search in general accordance with ASTM Standard E1527-13 criteria. The results of this search are summarized in the tables below for the subject property (Section 4.2.1) and for Surrounding Properties (Section 4.2.2). These search results rely on the accuracy of the data provided by the third-party vendor, the date at which the information is updated, and the scope herein did not include the locations of hazardous waste generator sites listed as “orphans” and/or “unmappable.” Appendix - [Regulatory Database Record Report](#).

4.2.1 Subject Property Summary

The results of the regulatory database search were reviewed by the environmental professional specific to the subject property as well as “orphan or non-plottable” sites which may contain findings specific to the subject property. If warranted, additional review of available regulatory files, on-line information, and/or Client provided information is additionally presented to provide an environmental professional opinion on the potential environmental risk associated with the identified regulatory finding. The following records were identified on the subject property.

- **No Database Findings** - Review of regulatory database did not identify any sites of environmental concern associated with the subject property; therefore, **LOW** Risk Rating.

4.2.2 Off-Site Property Summary

The CREtelligent environmental professional has reviewed the findings of the regulatory database search for the off-site properties which are residing within 500-feet of the subject property. Additionally, regulatory database findings associated with state and/or federal greater search distances (where identified within the prescribed ASTM search radii) were screened by the environmental professional for potential environmental relevance. Identified sites requiring greater discussion are expounded upon.

Per the environmental professional's review and interpretation of available information, other sites which were identified in the regulatory database search but are not summarized below, were deemed to NOT pose an increased environmental risk to the subject property for the following reasons: a) Site(s) only hold an operating permit with no documented violations and/or releases; b) Site(s) have been granted “No Further Action” by applicable regulatory agency and/or Corrective Action is on-going under the guidance of applicable regulatory agency and/or subject property was not identified as a responsible party, contributor, or off-site impact; c) Site(s) had no documentation indicating they impacted the subject property's soil, groundwater, and/or vapor media; d) Site(s) distance and/or topographic position relative to the subject property reduces the level of potential risk associated with the site(s), and/or e) RCRA TSD facilities reviewed and identified to NOT be hazardous waste generators. The following records (associated with facilities of environmental significance) were identified on adjacent and/or surrounding properties:

Surrounding Properties Summary

DATABASE	SITE NAME	ADDRESS	DIST. (FT) / DIR.	ELEV. DIFF. (FT)	COMMENTS
UST, LST, RCRA NON GEN, NY MANIFEST, FINDS/FRS	ALBANY INST. OF HISTORY & ART, HARMANUS BLEEKER DOVE ST, NIAGARA MOHAWK - A NATIONAL GRID CO	19 DOVE STREET/ CORNER OF DOVE & SPRING STREETS, ALBANY, NY 12210	>80/NNW	-2	Please see below for further discussion.
LST	HERSHEY RES STATE ST	302 STATE STREET, ALBANY, NY 12207	>220/ WSW	0	Please see below for further discussion.
RCRA NON GEN, UST, LST, GEN MANIFEST	ALBANY INSTITUTE OF HISTORY & ART	125 WASHINGTON AVENUE, ALBANY, NY 12210	>280/ NNE	-2	Please see below for further discussion.
NY SPILLS	SPRING ST PK LOT OIL	19 SPRING STREET PARKING LOT, ALBANY, NY 12210	>300/NW	5	LOW - This site was identified with a 2004 spill, with the caller remark stating, "Oil coming out of the ground in the parking lot behind the building, has not been cleaned up." A contractor was hired to clean the spill, and closure was reported in 2004. Therefore, based on regulatory status, the above conditions represent a LOW Environmental Risk.

DATABASE	SITE NAME	ADDRESS	DIST. (FT) / DIR.	ELEV. DIFF. (FT)	COMMENTS

Site Name(s):	ALBANY INST. OF HISTORY & ART, HARMANUS BLEEKER DOVE ST, NIAGARA MOHAWK - A NATIONAL GRID CO
Address:	19 DOVE STREET/ CORNER OF DOVE & SPRING STREETS, ALBANY, NY 12210
Distance/Direction:	>80/NNW
Findings: The regulatory database identified this site with the following information (the following information are summarized excerpts from the regulatory data (Please see Appendix – Regulatory Database Records Report for further details):	
<ul style="list-style-type: none"> The regulatory database report identified this site as having one 2,000-gallon #2 fuel oil underground storage tank (UST) installed in 1982. The tank was closed in place in 1994. The regulatory database report identified this site as a Leaking Storage Tank (LST) case involving contaminated soil found in the area surrounding the UST on July 27, 1994. The case was reported “closed” as of February 17, 1995; therefore, the New York State Department of Environment & Conservation determined the release no longer represented a threat to human health or the environment. This site was registered as a Resource Conservation and Recovery Act (RCRA) non-generator (NON GEN) in 2020. A hazardous waste generator is any person or site whose processes and actions create hazardous waste. Non-Generators do not presently generate hazardous waste. Therefore, based on regulatory status, the above conditions, as interpreted by the EP, represent a LOW Environmental Risk in connection with the subject property at this time. 	

Site Name(s):	HERSHEY RES STATE ST
Address:	302 STATE STREET, ALBANY, NY 12207
Distance/Direction:	>220/WSW
Findings: The regulatory database identified this site with the following information (the following information are summarized excerpts from the regulatory data (Please see Appendix – Regulatory Database Records Report for further details):	
<ul style="list-style-type: none"> The regulatory database report identified this site as an LST case involving contaminated soil encountered an old UST at a residence. No groundwater was encountered during the excavation and the UST was closed in place. Soil sampling was conducted and analytical results were above action levels. However, the area of the contamination was inaccessible and the area utilizes municipal sources for water and sewer. The case was reported “closed” as of January 12, 2007; therefore, the New York State Department of Environment & Conservation determined the release no longer represented a threat to human health or the environment. Therefore, based on regulatory status, the above conditions, as interpreted by the EP, represent a LOW Environmental Risk in connection with the subject property at this time. 	

Site Name(s):	ALBANY INSTITUTE OF HISTORY & ART
Address:	125 WASHINGTON AVENUE, ALBANY, NY 12210
Distance/Direction:	>280/NNE
Findings: The regulatory database identified this site with the following information (the following information are summarized excerpts from the regulatory data (Please see Appendix – Regulatory Database Records Report for further details):	
<ul style="list-style-type: none"> The regulatory database report identified this site with the following USTs that were installed prior to 1986 and removed in 1993: <ul style="list-style-type: none"> 1. one 6,000-gallon fuel oil UST; and 2. one 3,000-gallon fuel oil UST. These USTs are of steel construction. The regulatory database report identified this site as an LST case involving contaminated soil found in the area surrounding the USTs. The case was reported "closed" as of August 25, 1993; therefore, the New York State Department of Environment & Conservation determined the release no longer represented a threat to human health or the environment. This site was registered as a RCRA non-generator in 1993, 1999, 2001, 2002, 2006, and 2007. A hazardous waste generator is any person or site whose processes and actions create hazardous waste. Non-Generators do not presently generate hazardous waste. Past hazardous waste manifests identify corrosive and ignitable wastes. No compliance evaluation violations are reported. Therefore, based on regulatory status, the above conditions, as interpreted by the EP, represent a LOW Environmental Risk in connection with the subject property at this time. 	

Site Name(s):	CIVIL SERVICE EMPLOYEES ASSN INC, CAR W/CHEMICALS WASHINGTON AVE, C S E A
Address:	143 WASHINGTON AVENUE, ALBANY, NY 12210
Distance/Direction:	>310/N
Findings: The regulatory database identified this site with the following information (the following information are summarized excerpts from the regulatory data (Please see Appendix – Regulatory Database Records Report for further details):	
<ul style="list-style-type: none"> This site was identified with one NY SPILLS case pertaining to an incident in 1990 in which "chemical & bottles in car began smoking, FD removed bag to st. & sprayed area, closed off, 1 person may have been taken on stretcher." The incident was reported "closed" as of August 20, 1990. This site was registered as a RCRA very small quantity generator (VSQG) in 1995, 2006, and 2007. A hazardous waste generator is any person or site whose processes and actions create hazardous waste. Very small quantity generator facilities generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQGs may not accumulate more than 1,000 kilograms of hazardous waste at any time. The following hazardous wastes were generated in very small quantities: <ul style="list-style-type: none"> 1. silver; 2. lead; and 3. ignitable waste. No compliance evaluation violations are reported. Therefore, based on regulatory status, the above conditions, as interpreted by the EP, represent a LOW Environmental Risk in connection with the subject property at this time. 	

Site Name(s):	COLLEGE OF ST ROSE - PICOTTE HALL
Address:	324 STATE STREET, ALBANY, NY 12203
Distance/Direction:	>410/W
Findings: The regulatory database identified this site with the following information (the following information are summarized excerpts from the regulatory data (Please see Appendix – Regulatory Database Records Report for further details):	
<ul style="list-style-type: none"> This site was identified with two NY SPILLS cases, the first of which reported in 1986 due to equipment failure of a vac truck. The spill was contained and the incident was reported "closed" as of December 6, 1986. The second case was reported in 2002. During installation of a drain, workers encountered contaminated groundwater. Upon further investigation, no contaminated groundwater was identified. A recent tank closure in the area was thought to be a possible source. The college was going to handle the concern and water would be connected to the municipal source. The incident was "closed" as of April 2, 2002. This site was registered as a RCRA VSQG in 2005, 2006, 2007, and 2010. A hazardous waste generator is any person or site whose processes and actions create hazardous waste. Very small quantity generator facilities generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQGs may not accumulate more than 1,000 kilograms of hazardous waste at any time. The following hazardous wastes were generated in very small quantities: <ul style="list-style-type: none"> 1. cadmium; 2. lead; and 3. ignitable waste. During a compliance evaluation investigation in 2005, a violation was identified. This violation was reported to have returned to compliance shortly after. Therefore, based on regulatory status, the above conditions, as interpreted by the EP, represent a LOW Environmental Risk in connection with the subject property at this time. 	

Site Name(s):	HUDSON RIVER PCBS
Address:	NO STREET APPLICABLE, HUDSON RIVER, NY 12871
Distance/Direction:	>4,300/ESE
Findings: The regulatory database identified this site with the following information (the following information are summarized excerpts from the regulatory data (Please see Appendix – Regulatory Database Records Report for further details):	
<ul style="list-style-type: none"> This site was identified as being on the National Priority List, which refers to the U.S. Environmental Protection Agency's (EPA) list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Per the site's listing narrative, dated 1983: "The Hudson River PCBs Site is a 40-mile stretch of the Hudson River between Mechanicville and Fort Edward, New York. General Electric Co. discharged an estimated 1.1 million pounds of PCBs into this stretch of river. The State has identified 40 "hot spots," defined as sediments contaminated with greater than 50 parts per million (ppm) of PCBs. Also included in the site are five "remnant" areas, which are river sediments exposed when the level of the river was lowered due to removal of the Fort Edward Dam. The State has taken initial measures to stabilize the remnant areas from erosion. In September 1980, Congress passed an amendment to the Clean Water Act (CWA) that included the Hudson River PCB Reclamation Demonstration Project. Under this legislation, the EPA Administrator could authorize a 75 percent grant, not to exceed \$20 million. EPA issued a final Environmental Impact Statement in October 1982 evaluating various dredging alternatives for a demonstration project. EPA has prepared a feasibility study to evaluate alternative remedial actions under CERCLA. The Administrator has determined that CERCLA funds may be used for remedial action at the remnant areas and for evaluating the effectiveness of the water supply system at Waterford, New York." Per the EPA's website, the primary concern regarding this site is the consumption of PCB-laden fish by humans. This does not represent an environmental concern to the subject property. Therefore, based on distance, the above conditions, as interpreted by the EP, represent a LOW Environmental Risk in connection with the subject property at this time. 	

Site Name(s):	NAVY RESRV TRNING CNTR
Address:	ALBANY, NY
Distance/Direction:	>4,400/ESE
Findings: The regulatory database identified this site with the following information (the following information are summarized excerpts from the regulatory data (Please see Appendix – Regulatory Database Records Report for further details):	
<ul style="list-style-type: none"> This site was identified with one Formerly Used Defense Sites (FUDS) listing. Per the site history, "The pier was designed as a (coastal defense project) river defense and contained Gun mounts, radio section and docking for maintenance and repair to Naval Vessels patrolling the river. The Reserve center was located south of the access bridge and was utilized for training and conditioning of Naval candidates." The status of the project is listed as complete. Therefore, based on regulatory status and distance, the above conditions, as interpreted by the EP, represent a LOW Environmental Risk in connection with the subject property at this time. 	

5.0 REPORT RELIANCE

This EnviroScreen® report has been prepared for the exclusive use and reliance of the Client. Use or reliance by any other party is strictly prohibited without the written authorization of CREtelligent. Reliance on this EnviroScreen® report by the Client will be subject to the terms and conditions of the limitations and liability stated below. This EnviroScreen® report is valid for one-hundred and eighty (180) days from the date of completion.

6.0 REPORT LIMITATIONS & LIABILITY

In conducting the limited scope of services for this EnviroScreen® report, CREtelligent did not assess the following list of non-scope considerations in connection with the subject property, unless specifically requested by the Client and specified in this EnviroScreen® report, which is not an all-inclusive list: Physical On-Site Inspection of Subject Property and Adjacent Properties; City Directory Information; Interviews with Current/Past Owner(s), Occupant(s), and/or Key Site Manager(s); Interviews with State and/or Local Government Officials; Tax Files; Recorded Land Title Records; USGS 7.5 Minute Topographical Maps; Building Department Records; Zoning/Land Use Records; Previous Assessment Reports; Geologic/Hydrogeologic/Hydrologic/Topographic Conditions; Roads; Potable Water Supply; Sewage Disposal System; Current and/or Past Uses; Asbestos Containing Material; 2) Radon; 3) Lead Based Paint; Lead in Drinking Water; Wetlands; Sensitive Receptors; NEPA Check; Ecological Resources; Threatened and/or Endangered Species; Critical Habitats; Indoor Air Quality/Mold; Regulatory Compliance; Regulatory Permitting; Health and Safety; High Voltage Power Lines; Vapor Intrusion, etc. Without further confirmation by completing a Phase I EPA All Appropriate Inquiry (AAI), performed in accordance with ASTM E1527-13, the conditions affecting the subject property are unknown and CREtelligent makes no representations thereto. The EnviroScreen® report is not a substitute for a Phase I EPA All Appropriate Inquiry (AAI). Additionally, the performance of the EnviroScreen report will not meet the requirements for conducting a Phase I EPA All Appropriate Inquiry (AAI), performed in accordance with ASTM E1527-13, for qualifying for certain land owner liability protections under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). The clauses of CREtelligent's General Terms & Conditions (T&C) are incorporated herein by reference in this EnviroScreen® report with the same force and effect as though set forth in full text. A copy of the T&C is available upon written request. Informational sources consulted by CREtelligent during this EnviroScreen® report were obtained from sources considered reliable and believed to be true and correct. However, CREtelligent has made no independent investigation as to such matters and undertakes no responsibility for the accuracy of such items. In conducting the limited scope of services described herein, certain sources of information and public records will not be reviewed. It should be recognized that potential environmental concerns may be documented in public records that are not reviewed. No change of any item in this EnviroScreen® report shall be made by anyone other than CREtelligent and/or their representative, and CREtelligent and/or their representative shall have no responsibility for any such unauthorized change. This EnviroScreen® report shall be governed by and construed in accordance with the laws of the State of California (without regard to its conflicts of laws provisions). The parties hereto hereby agree that venue of any action in connection with the performance of this EnviroScreen® report shall be exclusively in Sacramento County, California, and that this EnviroScreen® report is performable in part in Sacramento County, California. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. CRETelligent SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR**

PURPOSE. ALL RISK IS ASSUMED BY THE CLIENT. IN NO EVENT SHALL CRETelligent BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF CRETelligent IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS ENVIROSCREEN® REPORT. Client accepts this EnviroScreen® report "AS IS". Any analyses, estimates, ratings, environmental risk ratings, levels, or risk codes provided in this EnviroScreen® report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Without further confirmation by completing the Phase I EPA All Appropriate Inquiry (AAI), performed in accordance with ASTM E1527-13, the conditions affecting the subject property are unknown and CREtelligent makes no representations thereto.

7.0 TERMS AND ACRONYMS

Terms and Acronyms	Description
Adjacent/Adjoining Property	Any real property or properties the border of which is contiguous or partially contiguous with that of the subject property, or that would be contiguous or partially contiguous with that of the property but for a street, road, or other public thoroughfare separating them.
AST	Aboveground Storage Tank
ASTM	American Society for Testing and Materials
AUL	Activity and Use Limitation
BGS	Below Ground Surface
BTEX	Benzene, Toluene, Ethylbenzene, and Xylenes
CDL	Clandestine Drug Lab
CERCLIS	Comprehensive Environmental Response Compensation and Liability Information System
COC	Contaminant of Concern
ERNS	Emergency Response Notification System
FED ENG/FED INST	Federal Engineering Controls/Federal Institutional Controls
FOIA	Freedom of Information Act
FUDS	Formerly Used Defense Sites
ICIS	Integrated Compliance Information System
LST	Leaking Storage Tank
LPST/LUST	Leaking Petroleum Storage Tank Leaking Underground Storage Tank
LUR	Land Use Restriction
MSL	Mean Sea Level
NFA/NFRA/NFRAP	No Further Action/No Further Remedial Action/No Further Remedial Action Planned
ND	None Detected
NOV	Notice of Violation
NPL	National Priorities List (aka Superfund)
PCB	Polychlorinated Biphenyls
PCE/PERC	Perchloroethylene, Tetrachloroethylene, Tetrachloroethene
PRP	Potentially Responsible Parties List
PST	Petroleum Storage Tank
RCRA	Resource Conservation and Recovery Act
RCRA CESQG	RCRA Conditionally Exempt Small Quantity Generator
RCRA CORRACTS	RCRA Corrective Action
RCRA LQG	RCRA Large Quantity Generators List
RCRA NON GEN	RCRA Non-Generator
RCRA SQG	RCRA Small Quantity Generators List

RCRA TSD	RCRA non-CORRACTS TSD Facilities
SEMS	Superfund Enterprise Management System
SUPERFUND ROD	Superfund Record of Decision
SWF/LF	Solid Waste Facility/Landfill
TRIS	Toxic Release Inventory Program

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Executive Summary

Property Information:

Project Property: 23C08-43944-586 ES
26 Dove St Albany NY 12210

Project No:

Coordinates:

Latitude: 42.65481408
Longitude: -73.76143675
UTM Northing: 4,723,227.18
UTM Easting: 601,517.19
UTM Zone: 18T

Elevation: 195 FT

Order Information:

Order No: 23030800505
Date Requested: March 8, 2023
Requested by: CREtelligent
Report Type: Express Database Report

Checked site with Kirt Molene and found no contaminated groundwater. wtc 04/08/2002 - Same problem occurred. Valley Equipment called me and did not find a problem. I spoke to Al Monroe from St.Rose and told him to check for any tanks in the area. 04/11/2002 - Al called and told me about a tank closure at 326 State Street. I believe this is where the problem is coming from. At this time the college is taking care of it. The water will be tied into the sewer system. wtc"

Caller Remark:

"Caller digging up old tanks and one tank failed at one point causing discolorization in soil. Cleanup pending further instruction."

DEC Remark:

"11/20/10 - Talked to Tom Perrault (Classic Environmental). He indicated they removed two tanks, one 500 UST #2 f.o. and one 1000 UST #2 f.o., from the apartment complex. The two tanks were located in separate excavations across the parking lot from each other. He indicated there was no problem with the 500 and they backfilled the excavation and did not take any samples. He indicated the 1000 excavation had problems in the bottom of the excavation and that is what they called the spill on. He indicated they had already backfilled the 1000 excavation for safety reasons. Advised him he should excavate the 500 excavation and take samples and he will need to excavate out the contamination from the 1000 excavation and take samples for 8260 and 8270 once they have dug clean. Told him we would like to see 1000 excavation prior to backfilling. He is going to dig it out this week, possibly Monday. He indicated the tanks were cut open and cleaned. PBS 4-601361 The owner of the property is Rossetti Properties LLC (Rich Rossetti), 423 Karner Road, Albany, NY. DP 1/10/11 - Report received from Alpha (see Edocs). Based on info, this site can be closed, DNMS. On low level hit of Benzene in remaining soil, rest of parameters meet 375 #s."

Caller Remark:

"LEAKING GENERATOR ABOUT 20 GALLON SPILLED TO THE CONCRETE GENERATOR ROOM. SOME MAY HAVE ENTERED THE STORM DRAIN CLEAN UP PENDING."

DEC Remark:

"Also rpt'd as 0907402; see Edocs. 10/02/09 - E-mail from Corey Dixon: Saftey Kleen will be sending us a full report of the clean up which I will forward to you. In the meantime I'll give you a short description of the issue. Our generator located in the parking garage at 99 Washington Ave was run for exercise for 1/2 hour on Wednesday, 9/30 at 6AM. Next day on 10/1, we were alerted by the landlord, Carrow Realty, of fuel on the ground in the area around the generator. We looked at the situation and contacted Safety Kleen to set up a dispatch for them to clean up the fuel. In the meantime we contained the fuel by spreading kitty litter on the ground to contain the spill, which was an estimated 20 gallons. There was also approximately 2 gallons of fuel laying in the bottom of our generator cabinet which was not leaking anywhere. Safety Kleen arrived on site appoximately 12:30 PM and promptly cleaned up the existing kitty litter and remaining fuel. An absorbent similiar to kitty litter was used to clean up the remaining fuel on the ground. A vac was used to remove the fuel from our generator cabinet, followed by absorbant cloths to clean up the remainder. All material was placed in barrels and stored on site. Waste material profiles and a placement form was filled out and the barrels have just been picked up by Safety Kleen for proper disposal. The fuel spill was caused by cracked fuel filter. Filter has been replaced and generator is back in proper order. wtc 01/12/10 - Cory will be sending me the Safety Kleen report. wtc 03/29/2010 - Report received. Closed wtc 3/27/14 - FOIL 14/055, Edoc CD w/0907402"

Caller Remark:

"SOIL SAMPLE SHOWS PETROLUEM READINGS."

DEC Remark:

"JDU telecom with Paul Shannon. He found some contamination during a subsurface investigation. Some appears to be related to an old tank field on site and some appears to be migrating from an offsite source. Paul will forward report. 5/18/21 Subsurface investigation completed by PS property Solutions. Report forwarded to DEC. See D2. Several Test pits were dug on site and soil was screened with a PID. Some elevated readings with a PID. No groundwater encountered. Soil sample results show some low levels of contamination. Based on past locations of tanks on site and neighboring spills it appears some of the impacts have migrated from an upgradient spill that was recently address by closing tanks and completing an SSI. Soil sample results from test pits show low level detections that meet residential SCO's except for one sample that meets commercial SCO's for 1,2,4-trimethylbenzene. Site is going to be paved over and used for a parking lot. Based on site history, history of other spills in the area, presence of municipal water and sewer, and planned site use the spill will be closed as not meeting standards. JDU"

Site Class Desc:		This classification is assigned to a site that has been properly closed but that requires continued site management consisting of operation, maintenance and/or monitoring. Class 4 is appropriate for a site where remedial construction actions have been completed for all operable units, but the site has not necessarily been brought into compliance with standards, criteria, or guidance (e.g., a groundwater extraction and treatment system has been installed and is operating properly but groundwater standards have not been achieved yet). The Record of Decision should define the remedial action objectives that need to be achieved during site management. If a Certificate of Completion (CoC) is to be issued for a site, the CoC is issued concurrently with the reclassification.				
Site Class Desc (Web):		This classification is assigned to a site that has been properly closed but that requires continued site management consisting of operation, maintenance and/or monitoring. Class 4 is appropriate for a site where remedial construction actions have been completed for all operable units, but the site has not necessarily been brought into compliance with standards, criteria, or guidance (e.g., a groundwater extraction and treatment system has been installed and is operating properly but groundwater standards have not been achieved yet). The Record of Decision should define the remedial action objectives that need to be achieved during site management. If a Certificate of Completion (CoC) is to be issued for a site, the CoC is issued concurrently with the reclassification.				
Assess DOH:		Remedial actions are complete and measures are in place to control the potential for coming in contact with residual contamination remaining at the site.				
Description:						

Location: The site consists of two adjacent lots at 140 State Street and the former location of the Albany Chemical Laboratories at 67 Howard Street in an urban/commercial area within the City of Albany near the State Capitol. Site Features: The 67 Howard Street parcel was a long narrow lot that abutted the back of the 140 State Street parcel. The lots have since been reconfigured. 140 State was made smaller to only consist of a new building with the original façade. The area of the 67 Howard parcel was significantly increased to include a former portion of 140 State Street and all or a portion of five other lots. 67 Howard Street is presently occupied by a large parking garage. The Former Albany Laboratories site is defined by metes and bounds in the site management plan. Current Zoning and Land Use: The site is zoned for commercial use. The immediate area is entirely commercial or government properties. The site and surrounding area is zoned C-3 Central Business District) which allows for residential dwellings greater than 600 square feet. Past Use of the Site: Sometime prior to 1934, the 67 Howard Street property was the location of a dairy farm. On a 1934 Sanborn map, 67 Howard Street was shown to have a chemical laboratory and the courtyard behind the building was shown to be used as a "Thinner storage yard in metal drums". According to city directories, the 67 Howard Street property was operated as Albany Laboratories from 1935 to 1985. The property has been vacant since 1985. The earliest records indicate that the 140 State Street property was originally a private dwelling. Circa 1914 documents reported that the property was used as doctor's offices and apartments. At some time prior to 1934 and until at least 1979, the building was used as the Berkshire Hotel. The building was vacant thereafter until it was demolished in 2008. Prior to the site being listed on the NYS Registry of Inactive Hazardous Waste Disposal Sites in February 2011, the site was overseen as spill No. 0704683. In July 2007 a 2,000 gallon fuel oil underground storage tank (UST) was found on the 140 State Street property and in September 2008 the UST was removed and 251.5 tons of impacted soil around the tank was excavated and disposed of off-site. Subsequent site investigations found chlorinated volatile organic compounds (VOCs), petroleum-related semi-volatile organic compounds (SVOCs) and mercury contamination in on-site soil. In September and October 2008, the top three feet of soil, 385.6 tons, was removed from the former courtyard area. Post-excavation samples indicated the presence of remaining soil contamination above standards. Once the on-site buildings were demolished, further excavation of impacted soil was conducted in 2011. Clean fill material brought to the site met the requirements for the identified site use as set forth in 6 NYCRR Part 375-6.7(d). Site Geology and Hydrogeology: Due to the steep incline toward the Hudson River (to the east), it is assumed that area groundwater flows due east to the river. A groundwater monitoring well was drilled through 50 feet of dense clay in an attempt to investigate groundwater, but no groundwater was found to a depth of 50 feet.

Assessment:

Nature and Extent of Contamination: Remediation at the site is complete. Prior to remediation, contamination consisted of chlorinated volatile organic compounds and petroleum-related contaminants in soil. Remedial actions have successfully achieved the soil cleanup objectives the site, and a site cover allows for commercial use at 67 Howard St., and restricted residential at the 140 State St. portion of the site. Remaining contamination in the soil and soil vapor is being managed under a site management plan

Site Class Desc:	This classification is assigned to a site that has been properly closed but that requires continued site management consisting of operation, maintenance and/or monitoring. Class 4 is appropriate for a site where remedial construction actions have been completed for all operable units, but the site has not necessarily been brought into compliance with standards, criteria, or guidance (e.g., a groundwater extraction and treatment system has been installed and is operating properly but groundwater standards have not been achieved yet). The Record of Decision should define the remedial action objectives that need to be achieved during site management. If a Certificate of Completion (CoC) is to be issued for a site, the CoC is issued concurrently with the reclassification.

Assess DOH: Remedial actions are complete and measures are in place to control the potential for coming in contact with residual contamination remaining at the site.

Description:

Location: The site consists of two adjacent lots at 140 State Street and the former location of the Albany Chemical Laboratories at 67 Howard Street in an urban/commercial area within the City of Albany near the State Capitol. Site Features: The 67 Howard Street parcel was a long narrow lot that abutted the back of the 140 State Street parcel. The lots have since been reconfigured. 140 State was made smaller to only consist of a new building with the original façade. The area of the 67 Howard parcel was significantly increased to include a former portion of 140 State Street and all or a portion of five other lots. 67 Howard Street is presently occupied by a large parking garage. The Former Albany Laboratories site is defined by metes and bounds in the site management plan. Current Zoning and Land Use: The site is zoned for commercial use. The immediate area is entirely commercial or government properties. The site and surrounding area is zoned C-3 Central Business District) which allows for residential dwellings greater than 600 square feet. Past Use of the Site: Sometime prior to 1934, the 67 Howard Street property was the location of a dairy farm. On a 1934 Sanborn map, 67 Howard Street was shown to have a chemical laboratory and the courtyard behind the building was shown to be used as a "Thinner storage yard in metal drums". According to city directories, the 67 Howard Street property was operated as Albany Laboratories from 1935 to 1985. The property has been vacant since 1985. The earliest records indicate that the 140 State Street property was originally a private dwelling. Circa 1914 documents reported that the property was used as doctor's offices and apartments. At some time prior to 1934 and until at least 1979, the building was used as the Berkshire Hotel. The building was vacant thereafter until it was demolished in 2008. Prior to the site being listed on the NYS Registry of Inactive Hazardous Waste Disposal Sites in February 2011, the site was overseen as spill No. 0704683. In July 2007 a 2,000 gallon fuel oil underground storage tank (UST) was found on the 140 State Street property and in September 2008 the UST was removed and 251.5 tons of impacted soil around the tank was excavated and disposed of off-site. Subsequent site investigations found chlorinated volatile organic compounds (VOCs), petroleum-related semi-volatile organic compounds (SVOCs) and mercury contamination in on-site soil. In September and October 2008, the top three feet of soil, 385.6 tons, was removed from the former courtyard area. Post-excavation samples indicated the presence of remaining soil contamination above standards. Once the on-site buildings were demolished, further excavation of impacted soil was conducted in 2011. Clean fill material brought to the site met the requirements for the identified site use as set forth in 6 NYCRR Part 375-6.7(d). Site Geology and Hydrogeology: Due to the steep incline toward the Hudson River (to the east), it is assumed that area groundwater flows due east to the river. A groundwater monitoring well was drilled through 50 feet of dense clay in an attempt to investigate groundwater, but no groundwater was found to a depth of 50 feet.

Assessment:

Nature and Extent of Contamination: Remediation at the site is complete. Prior to remediation, contamination consisted of chlorinated volatile organic compounds and petroleum-related contaminants in soil. Remedial actions have successfully achieved the soil cleanup objectives the site, and a site cover allows for commercial use at 67 Howard St., and restricted residential at the 140 State St. portion of the site. Remaining contamination in the soil and soil vapor is being managed under a site management plan

Site Class Desc:						
Site Class Desc (Web):		Complete: The classification used for sites where the Department has determined that remediation has been satisfactorily completed under a remedial program (i. e., State Superfund, Brownfield Cleanup Program, Environmental Restoration Program, Voluntary Cleanup Program, and RCRA Corrective Action Program). State Superfund (Registry) sites must have completed all active operation, maintenance, or monitoring requirements before they can be delisted and made class C. Non-registry sites may be made a class C after successful completion of all required construction or after a no further action remedy has been selected by the Department. These sites will be issued a Certificate of Completion (COC), but may still require ongoing maintenance and periodic certification of institutional/engineering controls (IC/ECs).				
Assess DOH:		Remedial actions are complete and measures are in place to control the potential for coming in contact with residual contamination remaining at the site.				

Description:

The Henry Johnson Boulevard Properties site is located in the Arbor Hill section of Albany. The site is composed of five individual non-contiguous parcels located on Henry Johnson Boulevard between Clinton Avenue and First Street. The city of Albany has proposed future commercial use of the properties. The total area of the site is approximately 0.34 acres. One of the parcels fronts on Clinton Avenue and four of the parcels front on Henry Johnson Boulevard. The parcel at 339 Clinton Avenue had an abandoned structure on it which was demolished in June 2011. The other parcels include 124, 126, 130 and 132 Henry Johnson Boulevard. The site is located in a mixed residential and commercial area. Originally this project included five additional parcels located along Henry Johnson Boulevard between First and Second Streets. Remedial investigation activities were conducted on these parcels, however they were removed from the defined Environmental Restoration Program site in December 2010 to allow for the construction of an Albany Public Library branch at this location. These five parcels include the properties at 214 and 216 Second Street, 138 and 150 Henry Johnson Boulevard and Howler Alley. A separate Certificate of Completion was issued for these five parcels in April 2012. The natural underlying near-surface soil deposits at the site are fine to medium brown sands above silt and clay; however much of the site area contains fill materials consisting of charcoal, wood, concrete, and brick. The silt and clay layer is at least forty feet thick in the vicinity of the site. Bedrock was not encountered during the remedial investigation. Groundwater was encountered at 4 to 10 feet below the ground surface, generally at the fill/silt-clay interface. Groundwater follows the topographical gradient of the area, moving to the southwest across the site. The utilities corridor under the sidewalk along Henry Johnson Boulevard probably does not locally affect the groundwater flow along this side of the site.

Assessment:

Remediation at the site is complete. The site is located in an urban area with no significant environmental habitats. Much of the near-surface soil in the area consists of fill material and there are no environmental exposure pathways of concern at the site. The excavation of the source area around the former building foundation at 124 Henry Johnson Boulevard went down into the clay soil and removed all known contaminated soil above soil cleanup objectives. PCE concentrations in soil confirmation samples ranged from 0.003 to 1.2 ppm after the IRM. DEC assessed the effectiveness of the potassium permanganate injection in the area where the building foundation was excavated and determined that the permanganate was addressing any VOC it came into contact with. However, residual PCE contamination impacted the groundwater in the shallow aquifer in the immediate vicinity of the source, but that groundwater is not used and is not discharging to surface water. The nature of the heavy clay beneath the fill material inhibits the movement of the PCE-contaminated groundwater, but it also inhibits the movement of the permanganate. So in July 2015, wax cylinders impregnated with potassium permanganate/sodium persulfate were placed in the monitoring wells that had PCE above the groundwater standard. Therefore, the contaminant sources have been eliminated and groundwater in affected wells has been treated. The cylinders were replaced in July 2016. Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in the soil and groundwater is being managed under the Site Management Plan. Semiannual permanganate distribution monitoring was conducted in June and September 2018, permanganate cylinders were replaced, and the site was inspected in September 2018. CVOCs in groundwater monitoring wells appear to be stable or decreasing with

----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

time. The remedy for the site remains effective, down-gradient receptors have not been adversely affected, and institutional controls for the site are in place.

Site Class Desc:						
Site Class Desc (Web):		Complete: The classification used for sites where the Department has determined that remediation has been satisfactorily completed under a remedial program (i. e., State Superfund, Brownfield Cleanup Program, Environmental Restoration Program, Voluntary Cleanup Program, and RCRA Corrective Action Program). State Superfund (Registry) sites must have completed all active operation, maintenance, or monitoring requirements before they can be delisted and made class C. Non-registry sites may be made a class C after successful completion of all required construction or after a no further action remedy has been selected by the Department. These sites will be issued a Certificate of Completion (COC), but may still require ongoing maintenance and periodic certification of institutional/engineering controls (IC/ECs).				
Assess DOH:		Remedial actions are complete and measures are in place to control the potential for coming in contact with residual contamination remaining at the site.				

Description:

The Henry Johnson Boulevard Properties site is located in the Arbor Hill section of Albany. The site is composed of five individual non-contiguous parcels located on Henry Johnson Boulevard between Clinton Avenue and First Street. The city of Albany has proposed future commercial use of the properties. The total area of the site is approximately 0.34 acres. One of the parcels fronts on Clinton Avenue and four of the parcels front on Henry Johnson Boulevard. The parcel at 339 Clinton Avenue had an abandoned structure on it which was demolished in June 2011. The other parcels include 124, 126, 130 and 132 Henry Johnson Boulevard. The site is located in a mixed residential and commercial area. Originally this project included five additional parcels located along Henry Johnson Boulevard between First and Second Streets. Remedial investigation activities were conducted on these parcels, however they were removed from the defined Environmental Restoration Program site in December 2010 to allow for the construction of an Albany Public Library branch at this location. These five parcels include the properties at 214 and 216 Second Street, 138 and 150 Henry Johnson Boulevard and Howler Alley. A separate Certificate of Completion was issued for these five parcels in April 2012. The natural underlying near-surface soil deposits at the site are fine to medium brown sands above silt and clay; however much of the site area contains fill materials consisting of charcoal, wood, concrete, and brick. The silt and clay layer is at least forty feet thick in the vicinity of the site. Bedrock was not encountered during the remedial investigation. Groundwater was encountered at 4 to 10 feet below the ground surface, generally at the fill/silt-clay interface. Groundwater follows the topographical gradient of the area, moving to the southwest across the site. The utilities corridor under the sidewalk along Henry Johnson Boulevard probably does not locally affect the groundwater flow along this side of the site.

Highlights:					Former Use: The site is in the City of Albany and is bordered by North Swan Street, Second Street, First Street, and residential properties. The site is on the corner of North Swan Street and Second Street, with one adjoining parcel on First Street. The site consists of a parking lot, basketball court and a vacant lot. There are no structures on the property. The vacant lot is gated and locked along First Street. This lot contains small vegetation and mulch that may have been re-graded during landscaping. The basketball court has a chain link fence surrounding the court and is elevated several feet above the rest of the Site. The site is surrounded primarily by residences. Northeast of the Site on the north side of Swan Street is the former St. Joesph's Academy, which is currently being renovated. Also on Swan Street, north of the Site, is Morro's Garage.

<i>Site Class Desc:</i>						
<i>Site Class Desc (Web):</i>		No Further Action at this Time: Sites are given a classification of "N" when:				

- a. the investigation and evaluation of a Class P site results in a determination that contamination at the site does not warrant placing the site on the Registry or it is being addressed under a brownfield program;
 - b. a site was in a brownfield program (BCP, ERP or VCP) or other non-Registry program, remediation was not completed, and the site did not otherwise qualify for listing on the Registry. As an example, this occurs when a volunteer begins a brownfield project and then for economic or other reasons, determines they cannot complete the work and the brownfield project is terminated. If the contamination at the brownfield site qualifies it for placement on the Registry, the Department acts to do so. If the site re-enters a brownfield program, it can be reclassified to Class A (active) to indicate that work has recommenced;
 - c. a site was identified simply as the location(s) where a drum(s) or other discrete waste was at one time present and subsequently removed by DEC or others and, based on the resulting conditions, no need for additional work was apparent; or
 - d. an application to the BCP, ERP or VCP was submitted, and was then withdrawn or terminated before any actions were taken to investigate or remediate the site.
- Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

Assess DOH:

Description:

Location: The site is situated in an urban area, in the City of Albany, and is bound by Myrtle Avenue to the north, South Swan Street to the east, residential land to the west, and portions of the former Hinckel Brewing Company and the City and Ice and Fuel Company to the south. Site Features: The site is improved with an approximate 31,000 square foot multi-level masonry and wood framed structure that was originally constructed at the late 1800s/early 1900s. Current Zoning and Land Use: The site is located in a R-2C (One—and Two—Family Row House Residential District). Other than the primary office space on the upper floor of the northwestern portion of the building, the remaining building spaces are used for warehousing, truck and equipment maintenance, and indoor truck parking. An open area within the north central portions of the site is used primarily for employee parking. Past Use of the Site: The site was initially developed in the late 1800's by the Hinckle Brewing Company. Other historical occupants of the site include: Capital Garage (car storage); Capital City Taxi, Kar Klean Body Repair, O'Brien Refuse Service; Hoy JJ Inc. Truck Maintenance, People Choices Taxi and Sullivan Fuel Service. Site Geology and Hydrogeology: The site is approximately 170 feet above Mean Sea Level. The site slopes gently to the east,

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

southeast toward the Hudson River. Based on area topography, groundwater movement is anticipated to be from the northwest to southeast toward the Hudson River. Groundwater is anticipated to be present at 20 to 30 feet below ground surface.

Assessment:

Information submitted with the BCP application regarding the environmental condition at the site are currently under review and will be revised as additional information becomes available.

 Site Class Desc:
 Site Class Desc (Web):

Complete: The classification used for sites where the Department has determined that remediation has been satisfactorily completed under a remedial program (i. e., State Superfund, Brownfield Cleanup Program, Environmental Restoration Program, Voluntary Cleanup Program, and RCRA Corrective Action Program). State Superfund (Registry) sites must have completed all active operation, maintenance, or monitoring requirements before they can be delisted and made class C. Non-registry sites may be made a class C after successful completion of all required construction or after a no further action remedy has been selected by the Department. These sites will be issued a Certificate of Completion (COC), but may still require ongoing maintenance and periodic certification of institutional/engineering controls (IC/ECs).

Assess DOH:
 Description:

This site is made up of five properties which were originally part of the Henry Johnson Boulevard Properties ERP site (E401049). The five properties were located on Henry Johnson Blvd. between 1st and 2nd Streets. The five properties were investigated with the remaining Henry Johnson Boulevard properties and were subsequently sold to the Albany Public Library (APL) for construction of the Arbor Hill/West Hill library branch. APL signed a consent order with the Department and put a vapor barrier and passive sub-slab venting system beneath the slab of the new building. They sampled the sub-slab vapor after the building was constructed and there were no issues requiring further remediation. APL was issued a Certificate of Completion on April 24, 2012.

Detail(s)

Description:

Location: The Niagara Mohawk Albany (Arch Street) Manufactured Gas Plant Site is located in a mixed commercial/industrial/residential neighborhood the intersection of Grand Street and Arch Street in the City of Albany. The site is made up of four adjacent parcels (150 Grand Street, 152 Grand Street, 75 Trinity Place, and 85 Trinity Place), now known as the Trinity Substation. Site Features: The main site features are the active electric substation on the northern portion. The areas of the site not containing equipment are covered by gravel. Current Zoning/Use: The site is currently zoned for commercial and industrial use. The surrounding parcels are currently zoned for commercial and residential uses. The nearest residential area is 0.1 miles west of the site. Past Use of the Site: The former gas works began operation in 1845, and was phased out in 1886 when the North Albany plant operations resumed. Most of the gas works structures were demolished by 1892 and were replaced by carpentry shops, blacksmith shops and storage buildings. By 1934 a shirt manufacturing facility expanded to occupy the entire block along Arch Street, and a garage was constructed on the parcel south of Park Avenue. The waste recycling building that currently occupies the parcel north of Park Avenue was constructed in the early 1900s. Site Geology and Hydrogeology: Subsurface materials encountered generally consisted of various fill deposits (including silt and clay, sand, concrete, brick, wood, cinders, ash, coal, etc.), typically 10 to 20 feet thick; overlying 10 to over 40 feet of glaciolacustrine clay/silt deposits (described as gray-brown clayey silt to silty clay, moderately plastic, with occasional interbedded silt/fine sand) and till (described as brown gray sandy silt/clay, non-plastic, with some gravel). Bedrock was not encountered during the field activities. Groundwater is typically encountered at depths ranging from 8 to 29 feet bgs and generally flows in a northwest-southeast direction.

Assess ENV:

Based upon investigations conducted to date, the primary contaminants of concern include benzene and several Polycyclic Aromatic Hydrocarbon (PAH) compounds. Soil - Benzene was found at depth within the former gas holder, at a concentration of 59 ppm, exceeding the soil cleanup objective (SCO) for commercial use (44 ppm). The PAH compounds were found in both shallow and deeper soils on site. Concentrations range from 2.1 ppm to 57 ppm, which all exceed the commercial SCOs. Groundwater - Benzene, toluene, ethylbenzene and xylene (BTEX) and phenol were found in groundwater exceeding groundwater standards. The maximum concentrations of contaminants in groundwater were found adjacent to the holder structure: 2400 ppb (benzene), 140 ppb (toluene), 25 ppb (ethylbenzene), 51 ppb (xylene), and 4 ppb (phenol). In addition, both 1,1,1-Trichloroethane (TCA) and 1,1,1-Dichloroethane (DCA) were found at concentrations that exceed groundwater standards, but these compounds are not associated with the former MGP operations. Soil Vapor - Toluene was detected at several sample locations across the site. 1,1,1-TCA was also found, but is not related to the former MGP operations. The site is being managed under a Site Management Plan.

Assess DOH:

Measures are in place to control the potential for coming in contact with subsurface soil and groundwater remaining on the site. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Environmental sampling indicates soil vapor intrusion is not a concern for off-site buildings. An evaluation of the potential for soil vapor intrusion to occur will be completed on-site should the current use of the site change.

Site Class Desc:						
Site Class Desc (Web):	No Further Action at this Time: Sites are given a classification of "N" when:					

a. the investigation and evaluation of a Class P site results in a determination that contamination at the site does not warrant placing the site on the Registry or it is being addressed under a brownfield program;

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

b. a site was in a brownfield program (BCP, ERP or VCP) or other non-Registry program, remediation was not completed, and the site did not otherwise qualify for listing on the Registry. As an example, this occurs when a volunteer begins a brownfield project and then for economic or other reasons, determines they cannot complete the work and the brownfield project is terminated. If the contamination at the brownfield site qualifies it for placement on the Registry, the Department acts to do so. If the site re-enters a brownfield program, it can be reclassified to Class A (active) to indicate that work has recommenced;

c. a site was identified simply as the location(s) where a drum(s) or other discrete waste was at one time present and subsequently removed by DEC or others and, based on the resulting conditions, no need for additional work was apparent; or

d. an application to the BCP, ERP or VCP was submitted, and was then withdrawn or terminated before any actions were taken to investigate or remediate the site.

The pier was designed as a (coastal defense project) river defense and contained Gun mounts, radio section and docking for maintenance and repair to Naval Vessels patrolling the river. The Reserve center was located south of the access bridge and was utilized for training and conditioning of Naval candidates.

Site Class Desc:		This classification is assigned to a site that has been properly closed but that requires continued site management consisting of operation, maintenance and/or monitoring. Class 4 is appropriate for a site where remedial construction actions have been completed for all operable units, but the site has not necessarily been brought into compliance with standards, criteria, or guidance (e.g., a groundwater extraction and treatment system has been installed and is operating properly but groundwater standards have not been achieved yet). The Record of Decision should define the remedial action objectives that need to be achieved during site management. If a Certificate of Completion (CoC) is to be issued for a site, the CoC is issued concurrently with the reclassification.				
Site Class Desc (Web):		This classification is assigned to a site that has been properly closed but that requires continued site management consisting of operation, maintenance and/or monitoring. Class 4 is appropriate for a site where remedial construction actions have been completed for all operable units, but the site has not necessarily been brought into compliance with standards, criteria, or guidance (e.g., a groundwater extraction and treatment system has been installed and is operating properly but groundwater standards have not been achieved yet). The Record of Decision should define the remedial action objectives that need to be achieved during site management. If a Certificate of Completion (CoC) is to be issued for a site, the CoC is issued concurrently with the reclassification.				
Assess DOH:		All waste is underground and there is little potential for direct contact. Contamination migration has been limited due to dense soil conditions. These soil conditions also limited the effectiveness of a groundwater treatment system which operated from 1992 to 2000. Groundwater is not used for drinking since the area is served by public water. The site is in a secure area and there are no current exposures.				
Description:		<p>Location: The site is located in an urban/institutional area of Albany, NY. The Albany College of Pharmacy occupies a neighboring parcel. Neighbors close by include the Albany Law School and Russell Sage College. Site Features: The site includes the laboratory building and an exterior parking lot. Current Zoning and Land Use: The property is zoned commercial-office (C-O) by the City of Albany and has a used-as code of Z35 which stands for non-hospital health facility. Colleges are located adjacent to the site. Past Use of the Site: The Wadsworth Lab was built on the grounds of the old Albany Almshouse and cemetery. The NYSDOH operated the Wadsworth Laboratory as a clinical microbiology and virology lab. Solvents were routinely used in the lab for various lab functions and also to clean glassware. From 1942 to 1958, the solvents (which included xylol, methanol, ethanol, ether, methyl ethyl ketone, mineral spirits, turpentine and chlorinated solvents) were burned in an open pit on the property. In 1958, the Albany County DOH mandated that open burning be discontinued. For the next 18 years, the solvents were dumped into the pit and allowed to infiltrate and/or evaporate. This practice was discontinued in 1976. It was estimated that about 100 gallons of solvents per year were disposed in this manner. Historic research revealed that the property was once used as a cemetery. During soil boring work activities, old human remains and fractured pieces of an old coffin were uncovered. Some of the old unmarked graves were relocated but many still rest under the parking lot. Site Geology and Hydrogeology: The uppermost bedrock geology is the the Normanskill Shale which is a carbon-rich, black shale, 465 million years old. On top of the bedrock lies a glacially-formed basin with a thick base of clay. Water conductivity is extremely low. The groundwater flow direction was determined to be to the east immediate vicinity of the site. Groundwater is located between 7-10 feet below the ground surface.</p>				
Assessment:		Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were methylene chloride in groundwater, and acetone, chloroform, toluene, trichloroethylene and benzene in soil. Remedial actions have successfully achieved soil cleanup objectives for commercial use. Residual contamination in the soil and groundwater is being managed under a Site Management Plan.

Violation/Evaluation Summary

Note: NO RECORDS: As of Jan 2023, there are no Compliance Monitoring and Enforcement (violation) records associated with this facility (EPA ID).

Handler Summary

Importer Activity: No
Mixed Waste Generator: No
Transporter Activity: No
Transfer Facility: No
Onsite Burner Exemption: No
Furnace Exemption: No
Underground Injection Activity: No
Commercial TSD: No
Used Oil Transporter: No
Used Oil Transfer Facility: No
Used Oil Processor: No
Used Oil Refiner: No
Used Oil Burner: No
Used Oil Market Burner: No
Used Oil Spec Marketer: No

Hazardous Waste Handler Details

Sequence No: 1
Receive Date: 20060301
Handler Name: VERIZON NEW YORK INC. MANHOLE
Source Type: Implementer
Federal Waste Generator Code: N
Generator Code Description: Not a Generator, Verified

Hazardous Waste Handler Details

Sequence No: 2
Receive Date: 20060302
Handler Name: VERIZON NEW YORK INC MANHOLE
Source Type: Implementer
Federal Waste Generator Code: N
Generator Code Description: Not a Generator, Verified

Hazardous Waste Handler Details

Generator Code Description: Not a Generator, Verified
Handler Name: VERIZON NEW YORK INC. MANHOLE

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

Formerly Utilized Sites Remedial Action Program:

[DOE FUSRAP](#)

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Government Publication Date: Mar 4, 2017

National Priority List:

[NPL](#)

Sites on the United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Nov 3, 2022

National Priority List - Proposed:

[PROPOSED NPL](#)

Sites proposed by the United States Environmental Protection Agency (EPA), the state agency, or concerned citizens for addition to the National Priorities List (NPL) due to contamination by hazardous waste and identified by the EPA as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Nov 3, 2022

Deleted NPL:

[DELETED NPL](#)

Sites deleted from the United States Environmental Protection Agency (EPA)'s National Priorities List. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Nov 3, 2022

SEMS List 8R Active Site Inventory:[SEMS](#)

The U.S. Environmental Protection Agency's (EPA) Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. This data includes SEMS sites from the List 8R Active file as well as applicable sites from the SEMS GIS/REST file layer obtained from EPA's Facility Registry Service.

Government Publication Date: Jan 25, 2023

Inventory of Open Dumps, June 1985:[ODI](#)

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

SEMS List 8R Archive Sites:[SEMS ARCHIVE](#)

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. This data includes sites from the List 8R Archived site file.

Government Publication Date: Jan 25, 2023

Comprehensive Environmental Response, Compensation and Liability Information System -[CERCLIS](#)**CERCLIS:**

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands:[IODI](#)

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned:[CERCLIS NFRAP](#)

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens:[CERCLIS LIENS](#)

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action:[RCRA CORRACTS](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Jan 23, 2023

RCRA non-CORRACTS TSD Facilities:[RCRA TSD](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by RCRA.

Government Publication Date: Jan 23, 2023

RCRA Generator List:[RCRA LQG](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Jan 23, 2023

RCRA Small Quantity Generators List:[RCRA SQG](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Jan 23, 2023

RCRA Very Small Quantity Generators List:[RCRA VSQG](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Jan 23, 2023

RCRA Non-Generators:[RCRA NON GEN](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Jan 23, 2023

RCRA Sites with Controls:[RCRA CONTROLS](#)

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

Government Publication Date: Jan 23, 2023

Federal Engineering Controls-ECs:[FED ENG](#)

This list of Engineering controls (ECs) is provided by the United States Environmental Protection Agency (EPA). ECs encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. The EC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2020 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Dec 22, 2022

Federal Institutional Controls- ICs:

FED INST

This list of Institutional controls (ICs) is provided by the United States Environmental Protection Agency (EPA). ICs are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site. The IC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2020 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Dec 22, 2022

Land Use Control Information System:

LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Institutional Control Boundaries at NPL sites:

NPL IC

Boundaries of Institutional Control areas at sites on the United States Environmental Protection Agency (EPA)'s National Priorities List, or Proposed or Deleted, made available by the EPA's Shared Enterprise Geodata and Services (SEGS). United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy.

Government Publication Date: Nov 3, 2022

Emergency Response Notification System:

ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System:

ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System:

ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Nov 6, 2022

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database:

FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This data is provided by the United States Environmental Protection Agency (EPA) and includes Brownfield sites from the Cleanups in My Community (CIMC) web application.

Government Publication Date: Sep 13, 2022

FEMA Underground Storage Tank Listing:

FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan:

FRP

List of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Dec 31, 2021

Delisted Facility Response Plans:

DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Dec 31, 2021

Historical Gas Stations:

HIST GAS STATIONS

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries:

REFN

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Aug 30, 2022

Petroleum Product and Crude Oil Rail Terminals:

BULK TERMINAL

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

Government Publication Date: Jun 29, 2022

LIEN on Property:

SEMS LIEN

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) provides Lien details on applicable properties, such as the Superfund lien on property activity, the lien property information, and the parties associated with the lien.

Government Publication Date: Jan 25, 2023

Superfund Decision Documents:

SUPERFUND ROD

This database contains a list of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include completed Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD) for active and archived sites stored in the Superfund Enterprise Management System (SEMS), along with other associated memos and files. This information is maintained and made available by the U.S. Environmental Protection Agency.

Government Publication Date: Dec 22, 2022

State**Registry of Inactive Hazardous Waste Disposal Sites in New York State:**

SHWS

State-and tribal- equivalent CERCLIS. State Superfund Program (Inactive Hazardous Waste Disposal Site Remedial Program) (IHWDS) - Oversees the identification, investigation and cleanup of sites where consequential amounts of hazardous waste exist. These sites go through a process of investigation, evaluation, cleanup and monitoring that has several distinct stages. This list is made available by New York State Department of Environmental Conservation's State Superfund Program.

Government Publication Date: Jan 3, 2023

Delisted Registry of Inactive Hazardous Waste Disposal Sites in New York:

DELISTED SHWS

This database contains a Registry of Inactive Hazardous Waste Disposal sites which have been removed from New York Department of Environmental Conservation's Environmental Site Remediation database.

Hazardous Substance Waste Disposal Sites:

[HSWDS](#)

A list of sites included in Hazardous Substance Waste Disposal Site Study reports made available by the New York Department of Environmental Conservation Division of Hazardous Waste Remediation. Provides information regarding the evolving status of hazardous substance waste disposal sites in New York.

Government Publication Date: Oct 24, 2003

Vapor Intrusion Legacy Site List:

[VAPOR](#)

New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion. This list is made available by Department of Environmental Conservation's Vapor Intrusion Legacy Site List. This database is state equivalent CERCLIS.

Government Publication Date: Dec 29, 2022

Solid Waste Facilities and Landfills:

[SWF/LF](#)

Solid Waste Information Management System (SWIMS) is an inventory containing active and inactive facilities throughout the state. This list is made available by Department of Environmental Conservation's Solid Waste Information Management System (SWIMS).

Government Publication Date: Dec 22, 2021

Inactive Landfill Facilities:

[LANDFILL INACTIVE](#)

List of inactive landfills in the State of New York. This data is made available by the New York State Department of Environmental Conservation (DEC). DEC notes that these are preliminary data and should not be regarded as a complete inventory of all landfills in the State, and also that site locations and attributes are preliminary and should not be relied upon without independent verification.

Government Publication Date: Sep 21, 2022

Waste Tire Facilities:

[WASTE TIRE](#)

This list of active Waste Tire Facilities is maintained by the New York State Department of Environmental Conservation. Waste tire storage facilities (WTSF) store waste tires or portions of waste tires. Most of these facilities require Part 360 permits, but under certain conditions a registration may be available.

Government Publication Date: Apr 7, 2022

Recycling Facilities:

[RECYCLING](#)

The Department of Environmental Conservation (DEC), Division of Materials Management (DMM), Bureau of Permitting and Planning regulates solid waste management facilities in accordance with 6 NYCRR Part 360. Information pertaining to those facilities is maintained with the Division's Solid Waste Information Management System (SWIMS) database. The Facility List is a dataset related to solid waste management facilities operating in the state, and includes such information as facility location, contact names and associated information, waste types managed, and regulatory information.

Government Publication Date: Apr 7, 2022

Leaking Storage Tanks:

[LST](#)

This database contains records of chemical and petroleum spill incidents. They include leaking aboveground storage tanks or leaking underground storage tanks, with incidents of tank test failures, tank failures and tank overflow. This list is made available by New York State Department of Environmental Conservation's Spill Response Program.

Government Publication Date: Jan 6, 2023

Delisted Leaking Storage Tanks:

[DELISTED LST](#)

List of Leaking Storage Tank sites which has been removed from New York Department of Environmental Conservation's Spill Response Program

Government Publication Date: Jan 6, 2023

Underground Storage Tanks- UST-Petroleum Bulk Storage (PBS):

[UST](#)

Facilities within the Petroleum Bulk Storage (PBS) that have underground storage tanks. Underground petroleum storage facilities with a combined storage capacity over eleven hundred (1,100) gallons. This list is made available by New York Department of Environmental Conservation's Environmental Site Database Search.

Government Publication Date: Nov 21, 2022

The Bulk Storage Program Database - AST:

[AST](#)

Facilities within the Petroleum Bulk Storage (PBS) that have aboveground storage tanks. Aboveground petroleum storage facilities with a combined storage capacity over eleven hundred (1,100) gallons. This list is made available by New York State Department of Environmental Conservation's Petroleum Bulk Storage (PBS) program.

Government Publication Date: Nov 21, 2022

Petroleum Bulk Storage:

TANKS

The Bulk Storage Program Database maintains the registrations of active and inactive bulk storage sites statewide. This database includes Petroleum Bulk Storage (PBS) tanks where no information is available on whether they are ASTs or USTs. This list is made available by Department of Environmental Conservation's Petroleum Bulk Storage (PBS) program.

Government Publication Date: Nov 21, 2022

Major Oil Storage Facilities (MOSF):

MOSF

In 1977, the New York State Legislature passed the "Oil Spill Prevention, Control and Compensation Act" (Article 12 of the Navigation Law). This law regulates all oil terminals and transport vessels operating in the waters of the State which have a storage capacity of 400,000 gallons or more. (Terminals and vessels with a capacity of 400,000 gallons or more are commonly referred to as major oil storage facilities or MOSFs). This list is made available by Department of Environmental Conservation's Major Oil Storage Facility (MOSF) Program.

Government Publication Date: Nov 21, 2022

Chemical Bulk Storage (CBS):

CBS

Facilities that store regulated hazardous substances in underground tanks. "Hazardous substance" means any substance listed as hazardous or acutely hazardous in 6 NYCRR Part 597 or a mixture thereof. This list is made available by Department of Environmental Conservation's Chemical Bulk Storage (CBS) Program.

Government Publication Date: Nov 21, 2022

Delisted Storage Tanks:

DELISTED TANKS

List of Storage Tank sites which has been removed from New York Department of Environmental Conservation's Environmental Site Database.

Government Publication Date: Nov 21, 2022

Delisted County Records:

DELISTED COUNTY

Records removed from county databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

Government Publication Date: Dec 5, 2022

Registry of Engineering Controls in New York State:

ENG

Registry of Engineering Controls in New York State taken from the Environmental Site Remediation Database.

Government Publication Date: Jan 3, 2023

Registry of Institutional Controls in New York State:

INST

Registry of Institutional Controls in New York State taken from the Environmental Site Remediation Database.

Government Publication Date: Jan 3, 2023

Voluntary Cleanup Agreements:

VCP

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites. This list is made available by Department of Environmental Conservation's Voluntary Cleanup Program.

Government Publication Date: Jan 3, 2023

Environmental Restoration Program Listing:

ERP

Environmental Restoration Program - Provides municipalities with financial assistance for site investigation and remediation at eligible brownfield sites. In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (Bond Act). Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. This list is made available by Department of Environmental Conservation's Environmental Restoration Program.

Government Publication Date: Jan 3, 2023

Brownfields Site List (Subset of Site Remediation):

BROWNFIELDS

Brownfield Cleanup Program was developed to enhance private-sector cleanups of brownfields and to reduce development pressure on "Greenfields". A Brownfield site is real property, the redevelopment or reuse of which may be complicated by the presence or potential presence of a contaminant. Contaminants include hazardous waste and/or petroleum. This list is made available by Department of Environmental Conservation's Brownfield Cleanup Program.

Government Publication Date: Jan 3, 2023

Tribal

Leaking Underground Storage Tanks (LUSTs) on Tribal/Indian Lands:

INDIAN LUST

This list of leaking underground storage tanks (LUSTs) on Tribal/Indian Lands in Region 2, which includes New York, is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jan 28, 2016

Underground Storage Tanks (USTs) on Indian Lands:

INDIAN UST

This list of underground storage tanks (USTs) on Tribal/Indian Lands in Region 2, which includes New York, is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Apr 04, 2016

Delisted Tribal Leaking Storage Tanks:

DELISTED INDIAN LST

Leaking Underground Storage Tank (LUST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian LUST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Nov 23, 2022

Delisted Tribal Underground Storage Tanks:

DELISTED INDIAN UST

Underground Storage Tank (UST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian UST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Nov 23, 2022

County

No County databases were selected to be included in the search.

Additional Environmental Record Sources

Federal

Facility Registry Service/Facility Index:

FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Aug 18, 2022

Toxics Release Inventory (TRI) Program:

TRIS

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Aug 24, 2021

Perfluorinated Alkyl Substances (PFAS) Releases:

PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances. The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Aug 24, 2021

Federal Agency Locations with Known or Suspected PFAS Detections:

PFAS FED SITES

List of Federal agency locations with known or suspected detections of Per- and Polyfluoroalkyl Substances (PFAS), made available by the U.S. Environmental Protection Agency (EPA) in their PFAS Analytic Tools data. EPA outlines that these data are gathered from several federal entities, such as the Federal Superfund program, Department of Defense (DOD), National Aeronautics and Space Administration, Department of Transportation, and Department of Energy. Sites on this list do not necessarily reflect the source/s of contamination and detections do not indicate level of risk or human exposure at the site. Agricultural notifications in this data are limited to DOD sites only. At this time, the EPA is aware that this list is not comprehensive of all Federal agencies.

Government Publication Date: Jun 30, 2022

PFOA/PFOS Contaminated Sites:

PFAS NPL

List of National Priorities List (NPL) and related Superfund Alternative Agreement (SAA) sites where PFOA or PFOS contaminants have been found in water and/or soil. The site listing is provided by the Federal Environmental Protection Agency (EPA).

Government Publication Date: Oct 4, 2022

Perfluorinated Alkyl Substances (PFAS) Water Quality:

PFAS WATER

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances.

Government Publication Date: Jul 20, 2020

SSEHRI PFAS Contamination Sites:

PFAS SSEHRI

This PFAS Contamination Site Tracker database is compiled by the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents, and this is cited in the tracker. Disclaimer: The source conveys this database undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Limited location details are available with this data. Access the following for the most current informations <https://pfasproject.com/pfas-contamination-site-tracker/>

Government Publication Date: Dec 12, 2019

National Response Center PFAS Spills:

ERNS PFAS

National Response Center (NRC) calls from 1990 to the most recent complete calendar year where there is indication of Aqueous Film Forming Foam (AFFF) usage. NRC calls may reference AFFF usage in the "Material Involved" or "Incident Description" fields. Data made available by the US Environmental Protection Agency (EPA). Disclaimer: dataset may include initial or misidentified incident data not yet validated or investigated by a federal/state response agency.

Government Publication Date: Feb 23, 2022

Hazardous Materials Information Reporting System:

HMIRS

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Sep 1, 2020

National Clandestine Drug Labs:

NCDL

The U.S. Department of Justice ("the Department"), Drug Enforcement Administration (DEA), provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Aug 30, 2022

Toxic Substances Control Act:

TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Apr 11, 2019

Hist TSCA:

[HIST TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing:

[FTTS ADMIN](#)

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing:

[FTTS INSP](#)

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List:

[PRP](#)

Early in the site cleanup process, the U.S. Environmental Protection Agency (EPA) conducts a search to find the Potentially Responsible Parties (PRPs). The EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site. This listing contains PRPs, Noticed Parties, at sites in the EPA's Superfund Enterprise Management System (SEMS).

Government Publication Date: Jan 25, 2023

State Coalition for Remediation of Drycleaners Listing:

[SCRD DRYCLEANER](#)

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRD no longer maintains this data, refer to applicable state source data where available.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS):

[ICIS](#)

The U.S. Environmental Protection Agency's Enforcement and Compliance History Online system incorporates data from the Integrated Compliance Information System - National Pollutant Discharge Elimination System (ICIS-NPDES). ICIS-NPDES is an information management system maintained by the Office of Compliance to track permit compliance and enforcement status of facilities regulated by the NPDES under the Clean Water Act. This data includes permit, inspection, violation and enforcement action information for applicable ICIS records.

Government Publication Date: Oct 15, 2022

Drycleaner Facilities:

[FED DRYCLEANERS](#)

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) online search. The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: Jun 25, 2022

Delisted Drycleaner Facilities:

[DELISTED FED DRY](#)

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: Jun 25, 2022

Formerly Used Defense Sites:

FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DOD) is responsible for an environmental restoration. The FUDS Annual Report to Congress (ARC) is published by the U.S. Army Corps of Engineers (USACE). This data is compiled from the USACE's Geospatial FUDS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) FUDS dataset.

Government Publication Date: Jul 12, 2022

Former Military Nike Missile Sites:

FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents:

PIPELINE INCIDENT

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

Government Publication Date: Mar 31, 2021

Material Licensing Tracking System (MLTS):

MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites:

HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File:

MINES

The Master Index File (MIF) is provided by the United State Department of Labor, Mine Safety and Health Administration (MSHA). This file, which was originally created in the 1970's, contained many Mine-IDs that were invalid. MSHA removes invalid IDs from the MIF upon discovery. MSHA applicable data includes the following: all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970; mine addresses for all mines in the database except for Abandoned mines prior to 1998 from MSHA's legacy system (addresses may or may not correspond with the physical location of the mine itself); violations that have been assessed penalties as a result of MSHA inspections beginning on 1/1/2000; and violations issued as a result of MSHA inspections conducted beginning on 1/1/2000.

Government Publication Date: Aug 3, 2022

Surface Mining Control and Reclamation Act Sites:

SMCRA

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Government Publication Date: Aug 18, 2022

Mineral Resource Data System:

MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

DOE Legacy Management Sites:

[LM SITES](#)

The U.S. Department of Energy (DOE) Office of Legacy Management (LM) currently manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The LM manages sites with diverse regulatory drivers (statutes or programs that direct cleanup and management requirements at DOE sites) or as part of internal DOE or congressionally-recognized programs, such as but not limited to: Formerly Utilized Sites Remedial Action Program (FUSRAP), Uranium Mill Tailings Radiation Control Act (UMTRCA Title I, Title II), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), Decontamination and Decommissioning (D&D), Nuclear Waste Policy Act (NWPA). This site listing includes data exported from the DOE Office of LM's Geospatial Environmental Mapping System (GEMS). GEMS Data disclaimer: The DOE Office of LM makes no representation or warranty, expressed or implied, regarding the use, accuracy, availability, or completeness of the data presented herein.

Government Publication Date: Dec 1, 2022

Alternative Fueling Stations:

[ALT FUELS](#)

This list of alternative fueling stations is sourced from the Alternative Fuels Data Center (AFDC). The U.S. Department of Energy's Office of Energy Efficiency & Renewable Energy launched the AFDC in 1991 as a repository for alternative fuel vehicle performance data, which provides a wealth of information and data on alternative and renewable fuels, advanced vehicles, fuel-saving strategies, and emerging transportation technologies. The data includes Biodiesel (B20 and above), Compressed Natural Gas (CNG), Electric, Ethanol (E85), Hydrogen, Liquefied Natural Gas (LNG), Propane (LPG) fuel type locations.

Government Publication Date: Jan 3, 2023

Superfunds Consent Decrees:

[CONSENT DECREES](#)

This list of Superfund consent decrees is provided by the Department of Justice, Environment & Natural Resources Division (ENRD) through a Freedom of Information Act (FOIA) applicable file. This listing includes Consent Decrees for CERCLA or Superfund Sites filed and/or as proposed within the ENRD's Case Management System (CMS) since 2010. CMS may not reflect the latest developments in a case nor can the agency guarantee the accuracy of the data. ENRD Disclaimer: Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA; response is limited to those records that are subject to the requirements of the FOIA; however, this should not be taken as an indication that excluded records do, or do not, exist.

Government Publication Date: Jan 11, 2023

Air Facility System:

[AFS](#)

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

Government Publication Date: Oct 17, 2014

Registered Pesticide Establishments:

[SSTS](#)

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

Government Publication Date: Mar 30, 2022

Polychlorinated Biphenyl (PCB) Transformers:

[PCBT](#)

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

Government Publication Date: Oct 15, 2019

Polychlorinated Biphenyl (PCB) Notifiers:

[PCB](#)

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Nov 3, 2022

State

Underground Injection Control Wells:

UIC

A well permit is required from the Division of Mineral Resources for any brine disposal well deeper than 500 feet. This includes any operation to drill, deepen, plug back or convert a well. Regardless of well depth, the NYSDEC Division of Water must be contacted for a determination of whether a SPDES permit is necessary to operate any brine disposal well.

Government Publication Date: Aug 6, 2018

Manufactured Gas Plants:

MGP

A list of former Manufactured Gas Plants (MGP) made available by the New York Department of Environmental Conservation (NYSDEC). From the late 1800's to the mid 1900's, hundreds of manufactured gas plants across New York State supplied homes and industry with fuel. Former MGP structures such as gas holders, tar separators, wells, and tanks were often susceptible to spills and leaks. As a result, these structures were a significant source of contamination from the release of tar and other toxic by-products.

Government Publication Date: Jan 9, 2023

Spill Incidents Database:

NY SPILLS

Spill Incidents Database has records dating back to 1978. This database contains records of chemical and petroleum spill incidents. The DEC Spill Response program receives and compiles reports of hazardous material spills occurring anywhere in New York State. These reports are submitted through the Spill Hotline and other mechanisms, and entered by DEC spill response staff into the state's official data base of Spill Incidents Reports. This list is made available by New York State Department of Environmental Conservation's Spill Response Program.

Government Publication Date: Jan 6, 2023

PFAS Remedial Sites:

PFAS CONTAM

List of sites being addressed under one of the New York Department of Environmental Conservation (DEC) Division of Environmental Remediation (DER)'s remedial programs, where the waste or contaminant of concern is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances.

Government Publication Date: Jan 3, 2023

Per- and Polyfluoroalkyl Substances (PFAS):

PFAS

A list of sites surveyed by the New York Department of Environmental Conservation to determine locations that manufacture, use, store, or release into the environment materials containing Per- and Polyfluoroalkyl Substances (PFAS). Per- and Polyfluoroalkyl Substances (PFAS) are a group of chemicals used to make fluoropolymer coatings and products that resist heat, oil, stains, grease, and water. Some PFAS are difficult to break down and persist in the environment that may cause harm to the public. This list is made available by the Department of Environmental Conservation of New York State.

Government Publication Date: Jan 16, 2019

Landfill Investigations PFAS Sampling Results:

PFAS LANDFILL

A list of inactive landfill sites that have been investigated for Per- and Polyfluoroalkyl Substances (PFAS) in the state of New York made available by the New York State Department of Environmental Conservation.

Government Publication Date: Jun 30, 2020

Registered Dry Cleaner Facilities:

DRYCLEANERS

The Division of Air Resources of the Department of Environmental Conservation (DEC) tracks all registered dry cleaner facilities.

Government Publication Date: Feb 8, 2023

Delisted Dry Cleaner Facilities:

DELISTED DRYCLEANERS

Sites removed from the list of dry cleaner facilities registered with the Department of Environmental Conservation (DEC)'s Division of Air Resources.

Government Publication Date: Feb 8, 2023

Hazardous Waste Manifest - Facilities:

NY MANIFEST

List of facilities located in New York that are included in the Hazardous Waste Manifest Data Downloads Location Address data file made available by the New York Department of Environmental Conservation (DEC), with which no manifests are associated. The Hazardous Waste Manifest Data made available by the NY DEC is compiled from hazardous waste manifest shipments to, from, or within New York State. The Bureau of Program Management, in the Division of Environmental Remediation, is responsible for maintaining hazardous waste manifest records.

Government Publication Date: Dec 15, 2022

Receivers from Hazardous Waste Manifests:

REC MANIFEST

List of receiver facilities located in New York that are included in the Hazardous Waste Manifest Data Downloads Location Address data file made available by the New York Department of Environmental Conservation (DEC), which are identified as a receiver in associated manifests. The Hazardous Waste Manifest Data made available by the NY DEC is compiled from hazardous waste manifest shipments to, from, or within New York State. The Bureau of Program Management, in the Division of Environmental Remediation, is responsible for maintaining hazardous waste manifest records. Hazardous Waste Code Descriptions are from NY Part 371.4 (6 CRR-NY 371.4) Identification and Listings of Hazardous Waste, unless otherwise noted.
Government Publication Date: Dec 15, 2022

Generators from Hazardous Waste Manifests:

GEN MANIFEST

List of generator facilities located in New York that are included in the Hazardous Waste Manifest Data Downloads Location Address data file made available by the New York Department of Environmental Conservation (DEC), which are identified as a generator in associated manifests. The Hazardous Waste Manifest Data made available by the NY DEC is compiled from hazardous waste manifest shipments to, from, or within New York State. The Bureau of Program Management, in the Division of Environmental Remediation, is responsible for maintaining hazardous waste manifest records. Hazardous Waste Code Descriptions are from NY Part 371.4 (6 CRR-NY 371.4) Identification and Listings of Hazardous Waste, unless otherwise noted.

Government Publication Date: Dec 15, 2022

New York City E-Designated Sites:

E DESIGNATION

A list of sites with an (E) Designation, described as a New York City (NYC) zoning map designation that indicates the presence of an environmental requirement pertaining to potential hazardous materials contamination, window/wall noise attenuation, or air quality impacts on a particular tax lot. The NYC Office of Environmental Remediation administers the E-Designation Environmental Review Program to avoid significant adverse impacts to human health or the environment through exposure to these hazards. The data is provided by the NYC Department of City Planning (DCP).

Government Publication Date: Nov 28, 2022

Registered Cooling Towers:

COOLING TOWERS

Locations of cooling towers registered with New York State, made available by the Center for Environmental Health. In August 2015, the New York State Department of Health released emergency regulations requiring the owners of cooling towers to register them with New York State. These data are self-reported by owners and/or property managers of cooling towers in service in New York State.

Government Publication Date: Aug 2, 2022

Tier 2 Report:

TIER 2

A list of Tier 2 facilities in the state of New York. This is a list of facilities which have reported hazardous substances provided by Homeland Security and Emergency Services.

Government Publication Date: Sep 28, 2022

NY DEC Projects of Interest:

PROJECTS

A list of permits for notable projects - permit applications that have received a lot of public attention - made available by the New York Department of Environmental Conservation (DEC).

Government Publication Date: Nov 26, 2021

Air Permitted Facilities:

AIR PERMITS

This list of issued state facility air permits is maintained by the New York State Department of Environmental Conservation (NYDEC). The listing includes Air State Facility Permits (ASF) and Air Title V Facility Permits (ATV). ASF permits may be required by medium-sized commercial or industrial facilities or larger facilities that have agreed to limit emissions. ATV permits may be required at the largest facilities statewide, or at facilities located in those areas where state implementation plans are in place to improve air quality. Please note: An Issued permit is valid for a stated period of time. Modifications may be made to an issued permit for the remainder of the active permit.

Government Publication Date: Dec 30, 2022

Liens Listing:

LIEN

New York Environmental Protection and Spill Compensation Fund (Oil Spill Fund) places liens on properties that are sites of oil spills when the owners are responsible parties and fail to pay for cleanup. The Office of the State Comptroller provides this listing of liens information from the Oil Spill Fund.

Government Publication Date: Oct 5, 2021

Tribal

No Tribal additional environmental record sources available for this State.

County

No County additional environmental record sources available for this State.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

RE: CITY DIRECTORY RESEARCH
26 Dove St
Albany, NY 12210

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:

15-35 of Dove Street

Search Notes:

Additional Information

Schedule A Description

Title Number AGT-17589-A-W

Page 1

ALL THAT TRACT OR PARCEL OF LAND, with the buildings thereon, situate, lying and being on the easterly side of Dove Street, between State Street and Washington Avenue, in the City of Albany, in the County of Albany, and State of New York, bounded and described as follows:

BEGINNING at a point in the easterly line of Dove Street distant northerly one hundred twenty-three and seven hundredths (123.07) feet from the northerly line of State Street and running thence easterly along the southerly wall of these described premises and at an interior angle of ninety (90) degrees and forty-six (46) minutes with said Dove Street, forty-four and fifty-six hundredths (44.56) feet to the westerly line of a cornice of a piazza on these described premises; thence southerly along said cornice line and square with the last described line, one and four tenths (1.4) feet; thence easterly along the same and square with the last described line twenty-two and seventy-six hundredths (22.76) feet, thence northerly along the same and square with the last described line, one and thirty-two hundredths (1.32) feet; thence easterly parallel with State Street and at an interior angle of two hundred sixty-nine (269) degrees and thirty-five (35) minutes with the last described line, sixty-four and sixty-eight hundredths (64.68) feet; thence northerly parallel with said Dove Street and at an interior angle of eighty-nine (89) degrees and thirty-nine (39) minutes with the last described line, twenty-two and five tenths (22.5) feet; thence westerly at an interior angle of ninety (90) degrees and twelve (12) minutes with the last described line sixty-six (66) feet to the northeasterly corner of the brick dwelling on these described premises; thence westerly at an interior angle of one hundred eighty (180) degrees and twenty (20) minutes with the last described line and along the northerly side of said brick dwelling, sixty-six (66) feet to said easterly line of Dove Street and thence southerly along said easterly line of Dove Street and at an interior angle of eighty-nine (89) degrees and twenty-eight (28) minutes with the last described line, twenty-one and ninety-seven hundredths (21.97) feet to the place of beginning; being the premises now known as Street No. 26 Dove Street.

The premises No. 26 Dove Street hereby conveyed, together with the adjoining premises No. 28 Dove Street, were surveyed May 6th, 1929, by Herschel Roberts, Civil Engineer, and are shown on a map thereof by him made, a blue print of which is attached to and was recorded with a warranty deed of said Premises No. 26 Dove Street from Mary C. Farrell to The Mosher Corporation, dated November 3rd, 1932, and recorded in the Albany County Clerk's Office November 5, 1932, in Book of Deeds No. 855 at Page 335.

Consultant Resumes

Christopher Evans

Environmental Professional

Education

B.S., Applied Mathematics, University of Akron, Akron, OH

Experience Summary

Mr. Evans has worked in the environmental due diligence field since 2015. His experience includes project management, report writing, and site reconnaissance. Mr. Evans has completed Phase I ESAs and PCAs in 49 states, Canada, and Puerto Rico. He has experience working with large portfolio projects involving over 100 sites in multiple states.

Project Experience

Due Diligence Environmental Site Assessments:

Working for a variety of clients, Mr. Evans has completed hundreds of Phase I ESAs including commercial, industrial, educational, raw land, and residential properties.

Property Condition Assessments:

Experience conducting site reconnaissance at commercial properties and assisting senior management with the completion of reports.
